MANUFACTURE OF HURRICANE  
RESISTANT, GLASS, IMPACT  
RESISTANT UNITS

Art Unit: 1772

Examiner: Donald J. Loney

Atty. Docket No. 41212-200409

Customer No.

**26694**

PATENT TRADEMARK OFFICE

**DECLARATION**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313

Sir:

Each of us state the following:

I am a coinventor in the above-identified application.

At the time we filed the provisional application in 2003, our relationship was that of customer and supplier. Our businesses are separate.

Together we had the idea that an economical process for retrofitting windows which were installed insulated windows to windows which were hurricane force resistant and retained the insulated structure could be commercially viable. To that end, we conceived removing an existing insulated glass unit, drilling an aperture in it; through the aperture introducing a plastic formulation which would adhere to at least one glass sheet of the insulated unit and set up.

Jim Lunde further states that the assignment of the application to Zircon Corporation was to defray or eliminate the costs of filing patent applications, prosecuting and issuing the patent application, with attendant fees.

I further acknowledge that willful false statements, herein, are punishable by fine and or imprisonment and/or may jeopardize the validity of any patent which issues.

Respectfully submitted,

Date: 2/28/2006

Charles E. Bayha
